PREFACE

This list has the principal parts of the equipment arranged alphabetically, the components of these parts being shown indented under their appropriate heading.

Each item is identified by a designation (i.e. the noun and any other words on the same line) and a catalogue number.

All items indented under an assembly or sub-assembly designation, are to be regarded as integral parts of the assembly etc.

Every item and assembly is shown in the text, and each is given a plate reference number. The numbers which do not appear on the plates are indicated thus /.

The equipment is divided into a number of groups each capable of being dealt with on one page of the text. To each of these groups an identification letter is allotted. The key plate facing page IV displays these letters with arrows indicating the various groups.
